

Food Grease H1

Features:

Winkel Food Grease H1 (159446) is a very strong sticking transparent non-toxic food grease with a high amount of solid particles. The extra strong additive package prevents wear, corrosion and water ingress, once water ingress has taken place the properties do not change. The solid parts have an extremely low coefficient of friction and are completely inert. It reduces damage caused by metal to metal contact as a result of a broken lubrication film on your application. As a result, it reduces wear, pitting and stick slip. Improved EP-properties through the solids.

- Transparent and clean
- Prevents corrosion
- Repels water
- Extremely good sticking properties
- Withstands salt water and steam
- Decreases friction, wear and noise
- Applicable in the food industry

Application:

Use and apply as a regular grease. Check before you mix with sodium and bentonite greases.

Operation Range:

On all places where a long lasting and high quality lubrication with improved anti-fretting properties has to be guaranteed under most circumstances and humid environments, like

- slide bearings
- toothed wheels
- slide bearings
- sliding contacts
- chains and cables
- suitable for the food industry
- suitable for automatic lubrication systems

Physical Properties	
Color	Off-white
Components	Medical oil, additives, solid lubricating properties
Density	Ca 0,9 kg/l
NLGI-grade	2
Thermal stability	Very good
Thermal application	-20°C - +170°C

Art Nr.	Content:
W 150 204	1 KG
W 150 204-18	18 KG
