

WINOL GLANZ (METAL POLISH)

PROPERTIES:

- Winol Glanz cleans, cares for, protects and polishes all pure metals (not suitable for anodized metals)
- Winol Glanz is non-toxic, gentle on the skin and contains a special corrosion protection that delays staining of metals.

ARE OF USE:

It is used on gold, silver, copper, bronze, brass, tin, aluminum, chrome, stainless steel, magnesium and nickel, but also on fiberglass, painted surfaces and aged automotive coatings. If you are a hobby polisher, you can polish matt shades with Winol Glanz (automobile) so that you do not see the transition on the paint surface to the rest of the surface.

METHODE OF USE:

- The application is simple - the result is convincing: Apply with a dry or damp cloth, leave on for a short time and then polish to a high gloss shine.
- It is more than just metal care: Winol Glanz retains its value, makes metals shine again and replaces the materials you have been using in the house, garden, car, boat, etc.

TECHNICAL INFORMATION:

Physical Stand	Viscose
Color	White
Odour	Perfume

ART. NR.
W 140 623

PACKING:
150 ML
