

# Crimp grip pliers

427/4CG

## Profiles

---

**Premium** + 

## Product features

- material: premium plus carbon steel
- surface finish: phosphated to standard ISO 9717
- heavy duty double - component handles

## Advantages:

- special designed clamping jaws hold the wire securely during the stripping process

## Usage:

- swivel knob micro-adjusts for thinner wire to 30AWG (0.05mm<sup>2</sup>) or thicker wire to 8AWG (8mm<sup>2</sup>)
- crimp non-insulated terminals 10-22AWG (1.5 to 6.0mm<sup>2</sup>)
- crimp insulated terminals 10-22AWG (1.5 to 6.0mm<sup>2</sup>)
- crimp auto ignition terminals 7 to 8mm

## Frequently asked questions

### **Why is it necessary to use crimping pliers for cable connections? Why not simply use combination pliers?**

When working with cable connections, you must use crimping pliers because this is the only way to press the connections together correctly and accurately. This is a requirement for the safety of the joints and provided for by the grooves/shapes on the pliers.
